

Activity of Oceanographic Command JMSDF

Commander, OGC
CAPT Sato

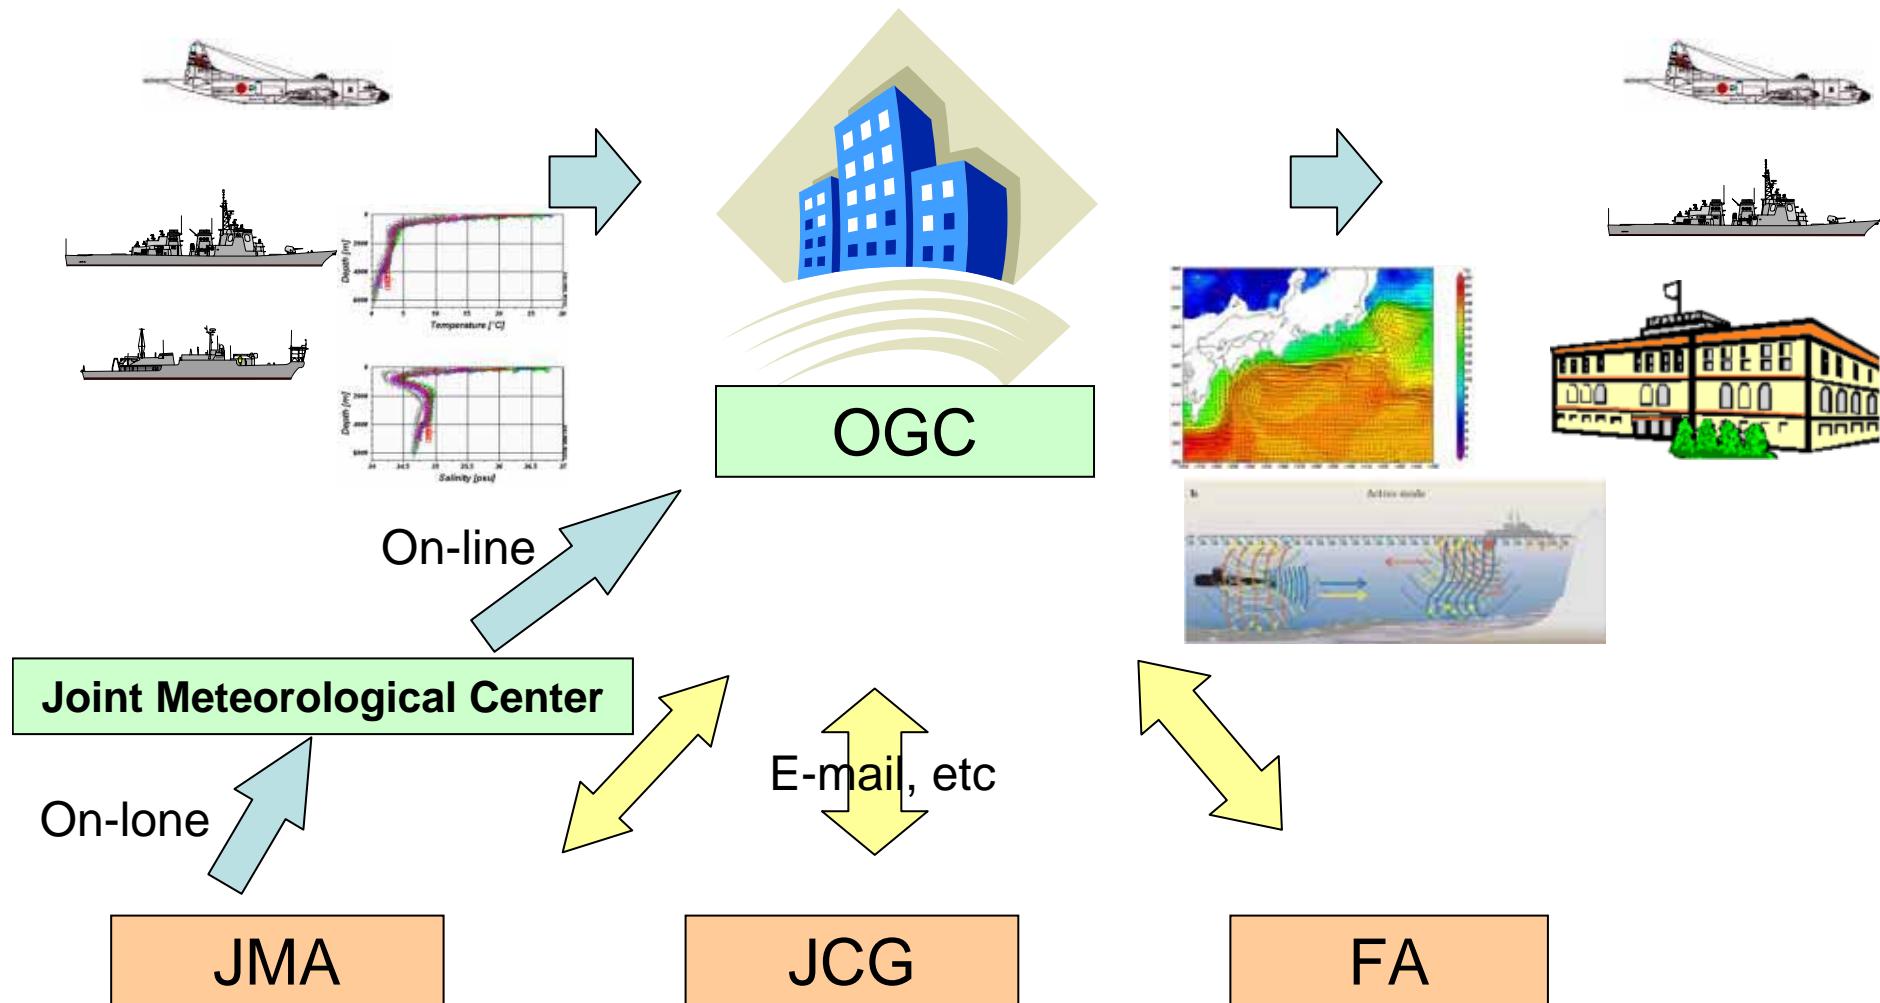

Oceanographic Command

- Headquarters (Yokosuka)
- AGS
 - SUMA, WAKASA, NICHINAN, SHONAN (Yokosuka)
- AOS
 - HIBIKI, HARIMA (Kure)
- ARC
 - MUROTO (Kure)
- ASWC (Yokosuka)
- WSU (Yokosuka)
- OOS (Shimokita, Katsuren)

Personnel: App.1,000

Data Flow

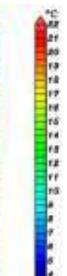

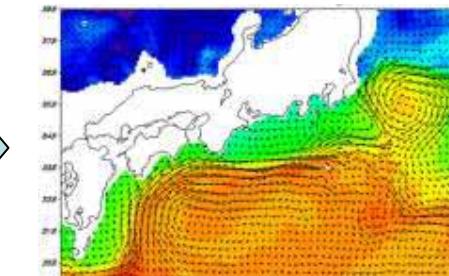

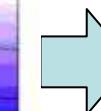

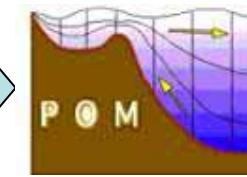

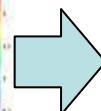

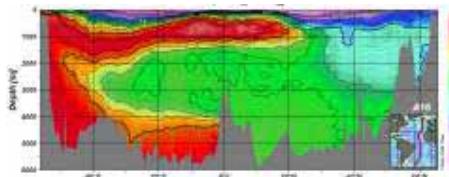

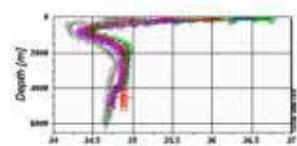

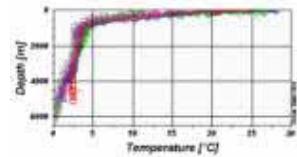

AGSs

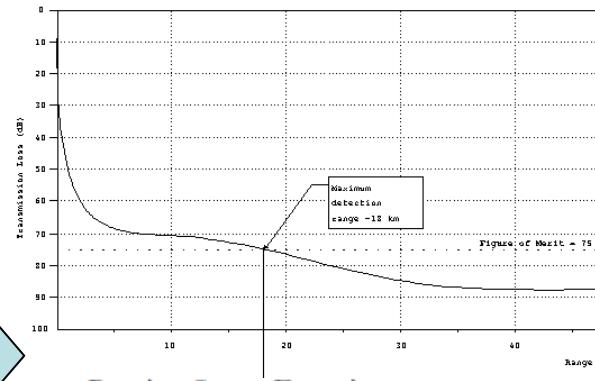

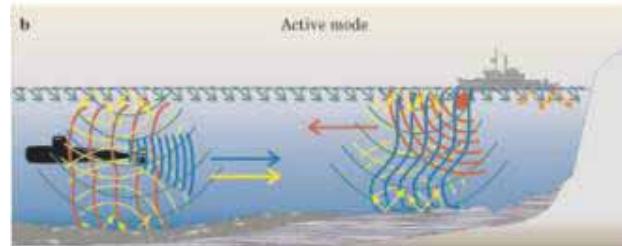

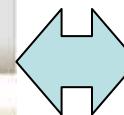

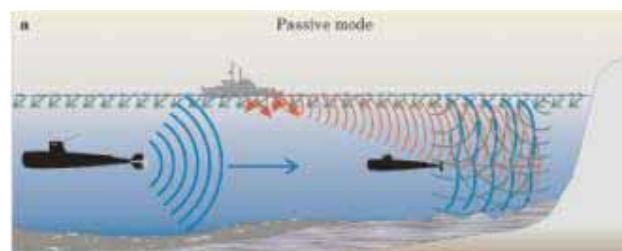

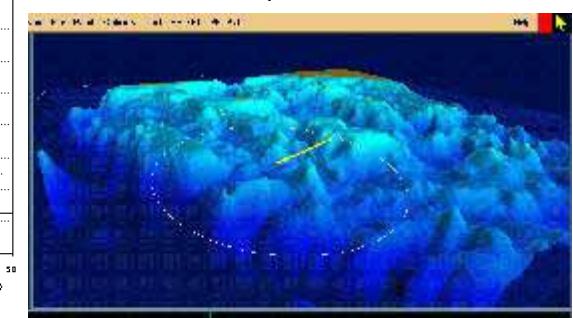

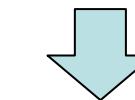

Oceanographic Data Acoustic Environment

$$\frac{\partial D_U}{\partial x} + \frac{\partial D_V}{\partial y} + \frac{\partial \omega}{\partial \sigma} + \frac{\partial \eta}{\partial t} = 0$$

$$\frac{\partial T_D}{\partial t} + \frac{\partial T_{UD}}{\partial x} + \frac{\partial T_{VD}}{\partial y} + \frac{\partial T_{\omega}}{\partial \sigma} = \frac{\partial}{\partial \sigma} \left[K_H \frac{\partial T}{\partial \sigma} \right] + F_T - \frac{\partial R}{\partial z}$$

Utilize for
SAR, DR

Passive Sonar Equation

$$SE = SL - PL - LE - RD$$

where:

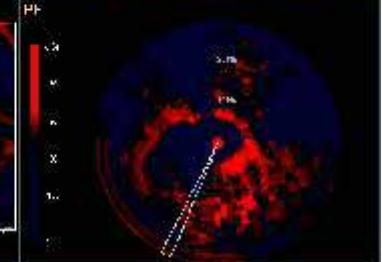

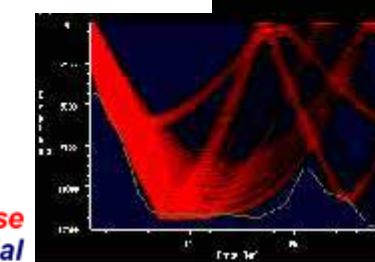

SE = Signal Excess

SL = Source Level

PL = Propagation Loss

LE = Total Background Noise

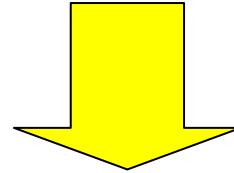

RD = Recognition Differential

Background (1 of 3)

After Tsunami hit the NPP, some radioactive water had leaked to the ocean.

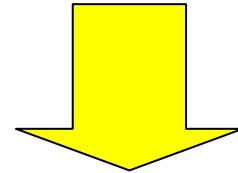

Had to find whether that leak affected to conduct any operation at sea.

Background (2 of 3)

Earthquake and Tsunami damaged many observation sites and instruments

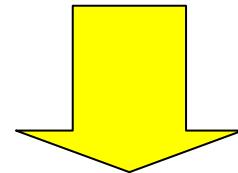

Need to get some data for assimilation
Improve the precision of the simulation model

Background (3 of 3)

- To find the actual situation of off the NPP
- To get data for assimilation
- To assess the precision of the simulation model

Conducted data acquisition and recording
operation off the NPP by AGS WAKASA

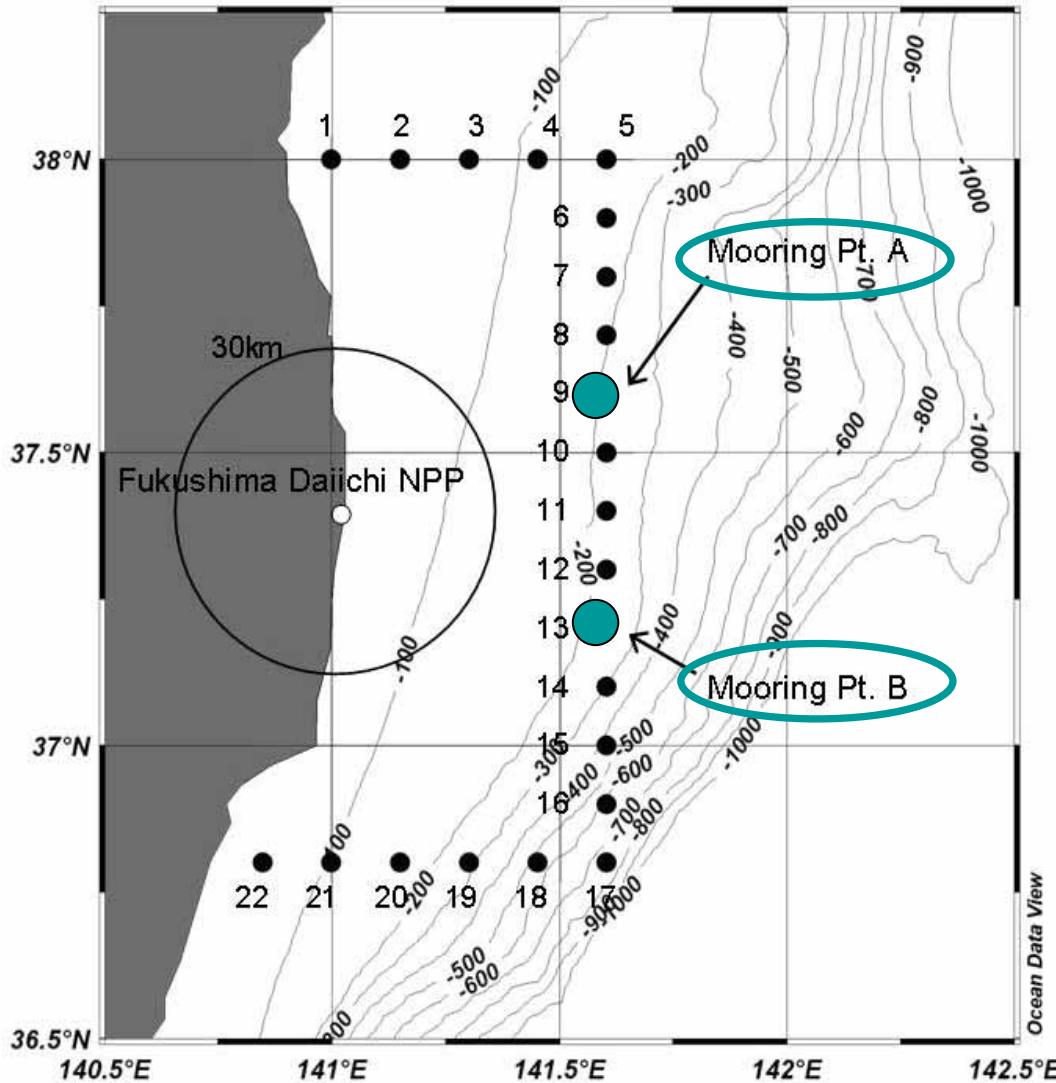

AGS WAKASA

Temperature / Salinity

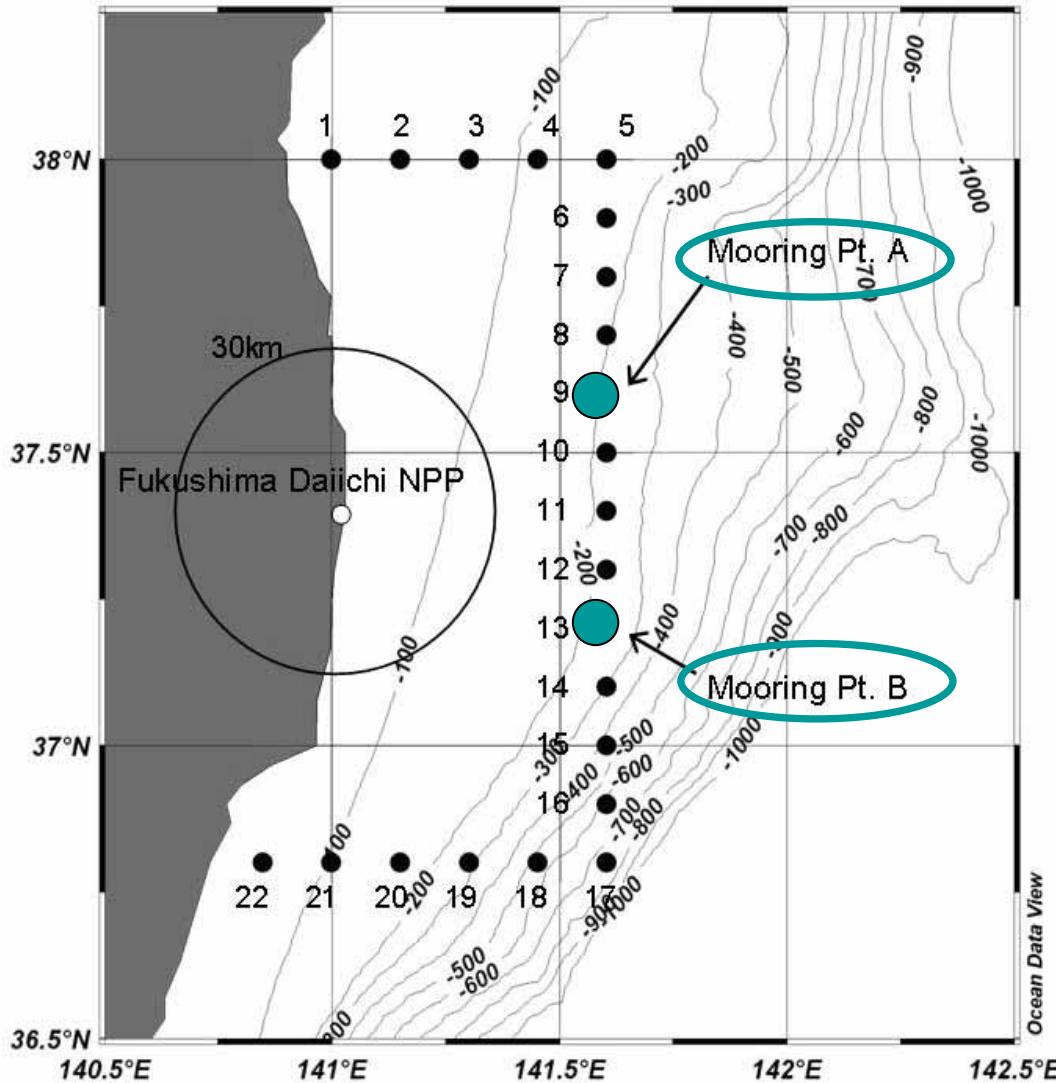

Points:
**Off the Fukushima
Daiichi NPP**
App.30NM
Pt1-Pt22 (every6NM)

Period:
May 1 – May 6

Instrument:
XBT, CTD, XCTD

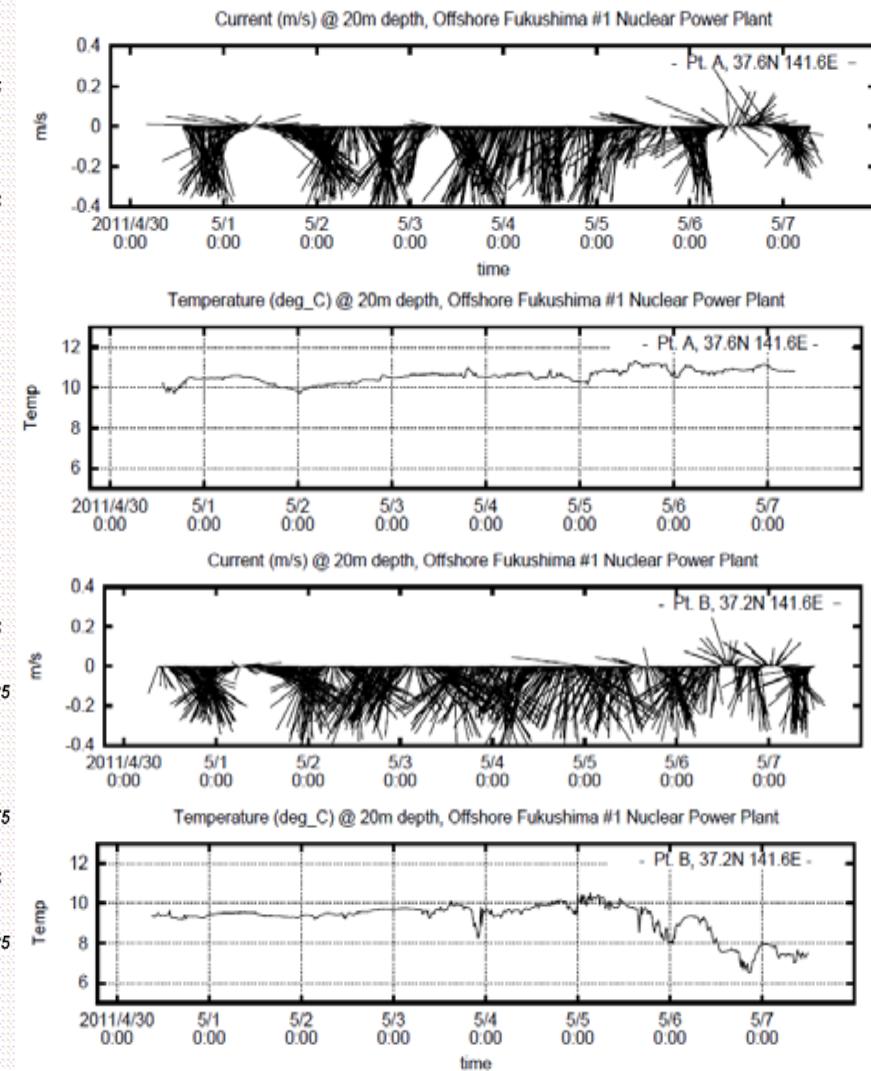

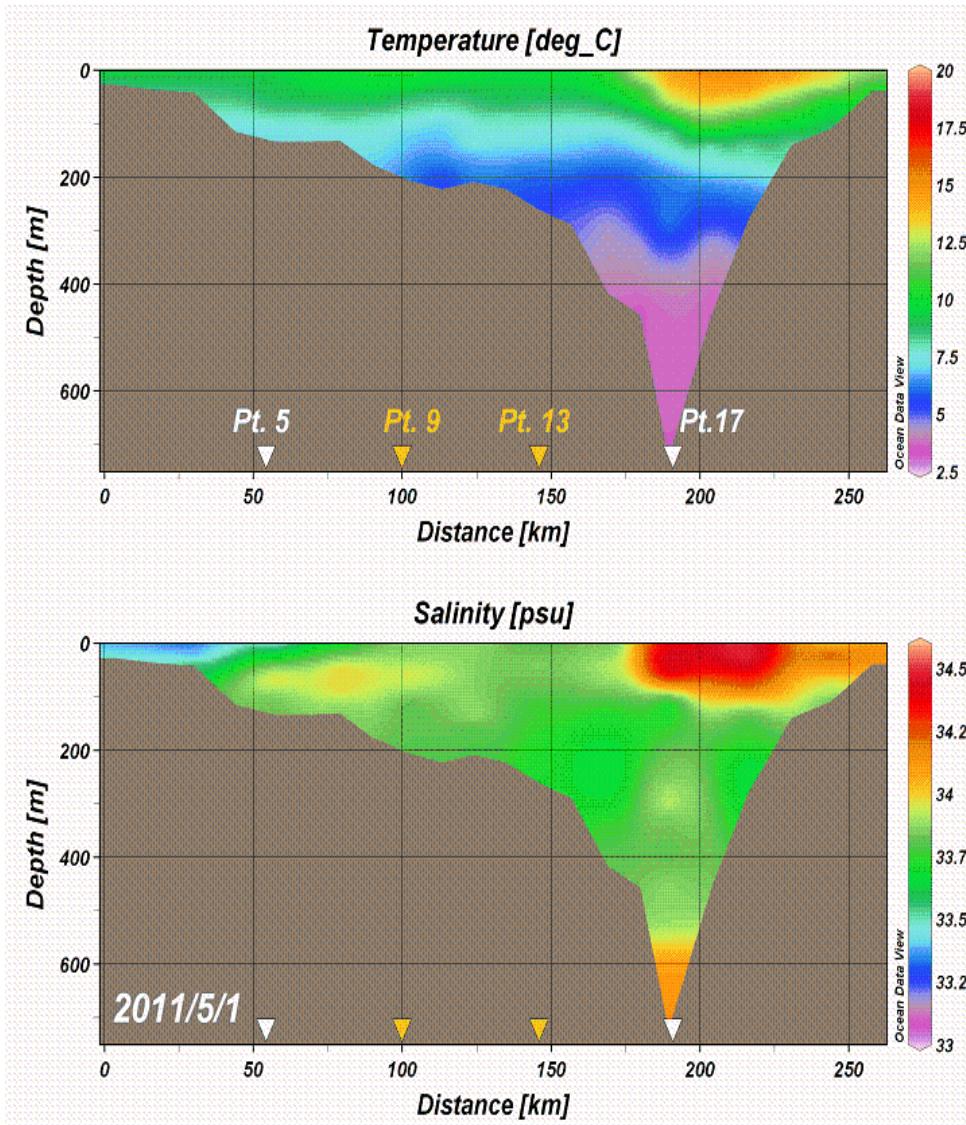

Current (Speed & Direction)

Mooring Points :
Pt.A(9), PtB(13)
Period :
Apr 30 – May 7
Depth : 20m
Sampling Rate
: 15min
Instrument :
Current meter
